## Modernist Encaustic

### INGREDIENTE CANTIDAD ESCALA PROCEDIMIENTO

---

|                          |         |      |  |
|--------------------------|---------|------|--|
| Encaustic medium (*) 1:5 | 140 gr. | 100% | <p>① Melt encaustic medium in a water bath in a glass jar, marmelade type. Let it melt completely, it will take 15 minutes approximately.</p> <p>② Outside, or in a very ventilated room away from any heat or flame source, pour the solvent and stir during 10 -15 seconds. Close the lid immediately.</p> <p>③ Let it cool.</p> |
| Disolvente               | 70 gr.  | 50%  |  |

**Tip:**  
Instead of weighing the ingredients you can add half of the volume of solvent.
